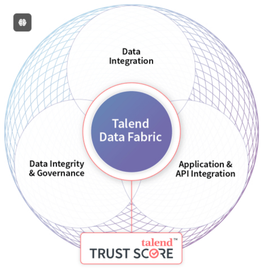
Thousands of organizations rely on Talend to turn data into business outcomes

TOYOTA Lenovo Domino's ABInBev ebay

End-to-end platform

Talend Data Fabric combines data integration, data quality, and data governance in a single, low-code platform that works with virtually any data source and data architecture.

Try Talend Data Fabric



Why is Talend the best value in modern data management?

Complete
Supports end-to-end data management needs across the entire organization, from integration to delivery

Flexible
Deploys on-premises, cloud, multi-cloud, or hybrid-cloud

Trusted
Drives clear and predictable value while supporting security and compliance needs

The data ecosystem that delivers

Whatever your data environment, Talend helps you get even more value through deep partnerships and integrations with top technology providers including AWS, Microsoft Azure, Snowflake, and more.

Meet our technology partners

Team with a Magic Quadrant Leader

See why Qlik and Talend are a Leader in the Gartner® Magic Quadrant™ for Data Integration Tools.
