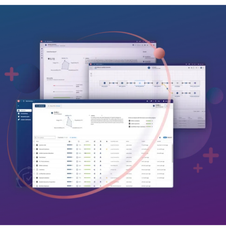
Talend Data Fabric

Get more value from your data with complete, flexible, trusted data management

Free trial Contact us

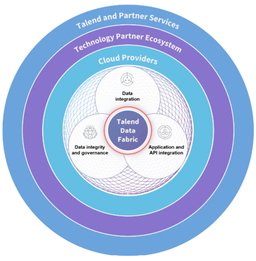


Are you making the right decisions?

Data is critical for any organization — but keeping data in good condition requires a careful balance between availability, usability, integrity, and security. Talend can help you achieve and maintain the complete, trustworthy, and uncompromised data you need to stay in control, mitigate risk, and drive value.

Make every decision with confidence

Talend brings data integration, integrity, and governance together in a single modular platform, supported by a strong partner ecosystem and services infrastructure.



The unified platform for reliable, accessible data

Data Integration
Unify all your data with simple tools to collect, transform, and map data

Data Quality
Automatically clean and profile data in real time so you don't have to worry about bad data even entering your systems

Data Integrity and Governance
Ensure data trust and excellence throughout the data lifecycle and assess data quality with the Talend Trust Score™

Application and API Integration
Share and deliver value from trusted data internally and externally with a multitude of self-service capabilities

Powered by Talend Trust Score™
Check the reliability of any dataset at-a-glance, over time, or at any point of time to improve data trust

Why you need Talend Data Fabric

With Talend on your side, you can easily launch data-driven initiatives that will make a difference to your business:

- Build customer loyalty and enthusiasm
- Improve operational efficiency and save money
- Reduce risk and ensure regulatory compliance
- Modernize IT infrastructure and optimize costs
